WoodPrint™
Synchronized Texture by Uniboard

Uniboard's Woodprint Technology is the first synchronized texture in Thermofused Laminates in North America. The technology aligns the décor paper and the surface texture to replicate real wood characteristics that are perfectly synchronized, just as they would be in nature.

The text "H50" is enclosed within a thin white square border. The background of the entire page is a dark, vertical wood-grain texture.

BRUSHED ELM

For 2014, Brushed Elm is offered in six trendsetting, cool neutral colours that are suitable for all design projects and emphasize the beauty of Woodprint. This collection offers a designer look that is better than nature with the versatility of TFL.

HIGH-END WOODPRINT FINISH

Brushed Elm is a luxurious deep brushed wood texture. The matte-oiled surface replicates hours of hand polishing emphasizing the natural cathedrals, straight grain and crosscut characteristics of this wood pattern. The 3-dimensional nature of this finish creates beautiful relief and light reflections in all vertical and horizontal applications. This finish is perfect for commercial and residential settings alike.

H58

AURA

This five colour collection focuses on linear woodgrains with natural appeal. A subtle abstract wood pattern that is a beautiful colour carrier and a walnut that will steal the show. Both patterns chosen specially to enhance the natural effects of the Aura finish.

TWILIGHT **H59**

NATURAL WOOD VENEER FINISH

Aura has a low lustre polish and complex woodgrain that mimics real wood. The soft touch is perfect for horizontal application in office furniture and a beautiful wood alternative in commercial and residential settings.

MORE DESIGNER CHOICES

These seven colours use pattern and finish together to create a great visual and tactile experience. From amazing rustics and crosscut woods paired with our RIO finish to a seductive Supermat grey suede, these designer choices are winners every time.

Contemporary trends evolve around the combination of sight and touch. The evolution of TFL design has never been so exciting as this Uniboard product launch.
